

INDIAN

FALL ARREST SYSTEM : OVER THE HEAD

Horizontal Fall Arrest System Over the Head is specially developed for providing safety while working on trucks, trains and other horizontal work areas.

APPLICATIONS

- Truck loading/unloading
- Train Top Work
- EOT Cranes
- Awkward work places where horizontal & vertical safety is required

ASPECTS & ADVANTAGES

- Complete SS316 system
- Continuous movement with complete fall protection over long Span.
- Shock Absorber to reduce jerk load on user & Structure
- Atex approved for use in Potentially Explosive Areas.

NAME OF COMPONENT	MATERIAL OF CONSTRUCTION
Wire Rope	SS316 (8mm Diameter)
Tensioner	SS316
Cable Extremity	SS316
Shock Absorber	SS316
Extremity Plate	SS316
Intermediate Bracket	SS316
Detachable Trolley	SS316
Retro guard Fall Arrest Block	In Various lengths

INDIAN

INOVATIX
LTD.**EXTREMITY PLATE**

ESPAR0000038

Made from SS316 grade.
Fixes with different types
of structures.

INTERMEDIATE BRACKET

ESPAR0000041

Stainless steel bracket with
mounting hardware. To reduce
cable sag. Fits with 08mm dia
cable. Recommended to be
installed every 10 to 15mtrs.

CABLE EXTREMITY

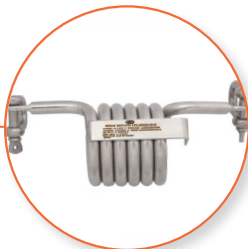

ESPAR0000039

Made from Stainless Steel 316
grade to provide high corrosion
resistance. Provides swageless
termination to the cable. Fits
08mm diameter cable. Fixed at
one end of the lifeline.

SHOCK ABSORBER

ESPAR0000034

Spring type design. Made from SS316
grade. Absorbs shock generated
during a fall which avoids transfer to
the user and the structure.

TENSIONER

ESPAR0000037

Made from Stainless Steel 316 grade to
provide high corrosion resistance. Provides
& maintains required tension to the cable.
Provides swageless termination to the
cable. Fits 08mm diameter cable.

DETACHABLE TROLLEY

EFINI0000033

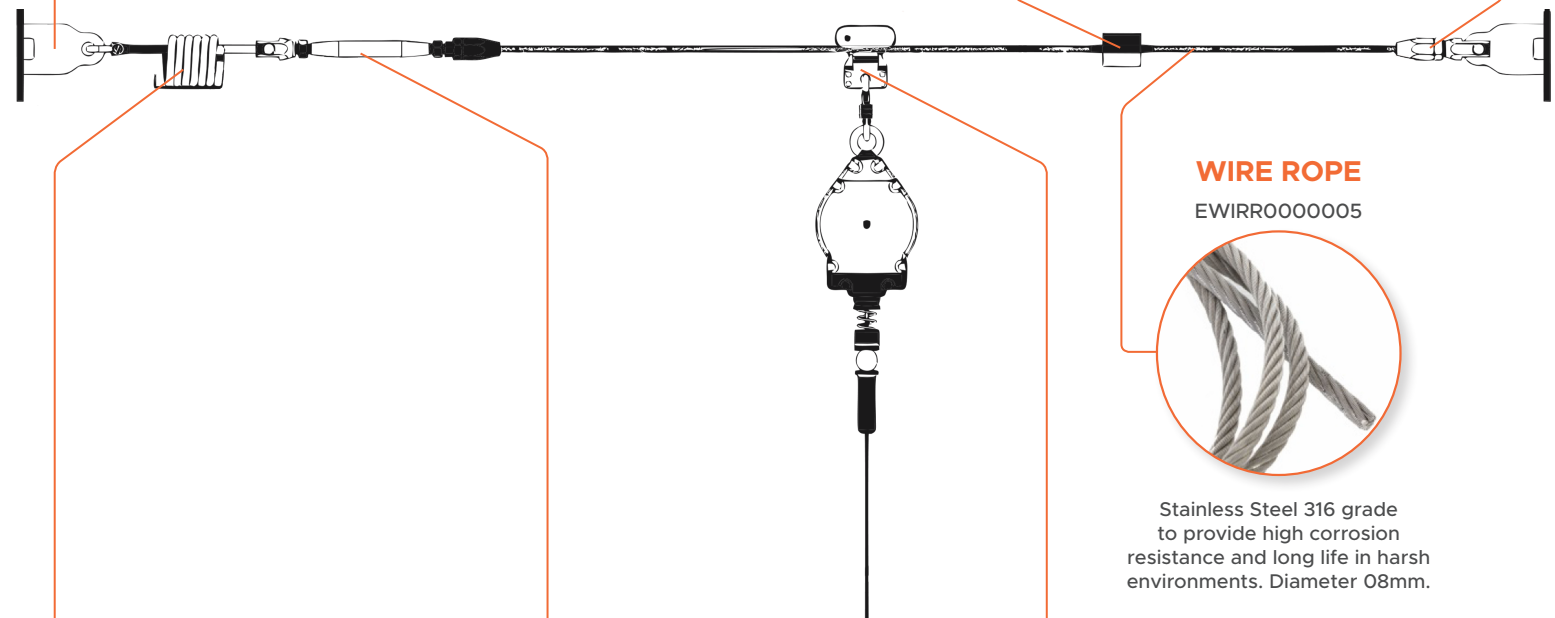

Provides smooth travel on the
08mm cable. Comes in two
types- Pass through type & non
pass through type.

WIRE ROPE

EWIR0000005

Stainless Steel 316 grade
to provide high corrosion
resistance and long life in harsh
environments. Diameter 08mm.
