FALL ARREST SYSTEM : OVER THE ROOF

Horizontal Fall Arrest System Over the Roof is specially developed for providing safety while working on roofs

APPLICATIONS

- Roofs
- Pre-Engineered buildings

ASPECTS & ADVANTAGES

- Complete SS 316 system
- Continuous movement with complete fall protection over long spans.
- 100% water proofing
- Available for standing seam roofs
- Shock absorber provided to reduce impact load on user & structure.

NAME OF COMPONENT	MATERIAL OF CONSTRUCTION
Wire Rope	SS316 (8mm Diameter)
Tensioner	SS316
Cable Extremity	SS316
Shock Absorber	SS316
Detachable Trolley	SS316
Extremity Posts	SS316
Intermediate Post	SS316
Corner Post	SS316

PASS THROUGH TYPE DETACHABLE TROLLEY

EFINI0000109

Provides smooth travel on the 08mm cable. The trolley passes through intermediate bracket

WIRE ROPE

EWIR0000005

Stainless Steel 316 grade to provide high corrosion resistance and long life in harsh environments. Dia 08mm.

ROOF TOP ANCHOR POST EXTREMITY

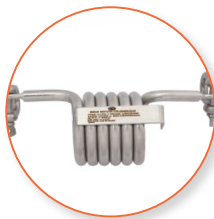

EFINI0000073

Made from SS316 grade. Fixes with standing seam and regular galvalume roof sheets.

SHOCK ABSORBER

ESPAR0000034

Spring type design. Made from SS316 grade. Absorbs shock generated during a fall which avoids transfer to the user and the structure.

9 STANDING SEAM CLAMPS

EFINI0000145

Made from Aluminum. These clamps provide rigid anchorage with roofs having standing seams.

CABLE EXTREMITY

ESPAR0000038

Made from Stainless Steel 316 grade to provide high corrosion resistance. Provides swageless termination to the cable. Fits 08mm diameter cable. Fixed at one end of the lifeline.

ROOF TOP ANCHOR POST INTERMEDIATE

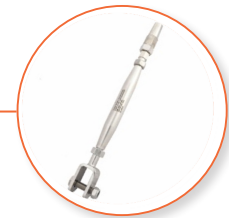

EFINI0000074

Made from SS316 grade. Fixes with standing seam and regular galvalume roof sheets. Has intermediate bracket to reduce cable sag.

TENSIONER

ESPAR0000037

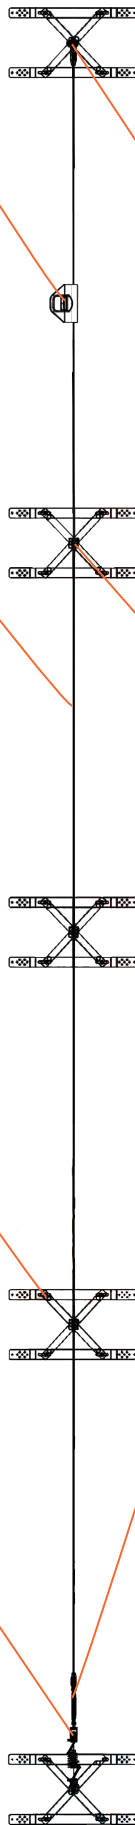

Made from Stainless Steel 316 grade to provide high corrosion resistance. Provides & maintains required tension to the cable. Provides swageless termination to the cable. Fits 08mm diameter cable.

8 CORNER POST

EFINI0000107

Made from SS316 grade. Fixes with standing seam and regular galvalume roof sheets. Has a corner piece to provide uninterrupted movement to the user to all parts of the roof.
