

# CONTAINER ANCHOR POST

## Technical Datasheet

- Container Anchor post is meant to provide a temporary anchor for working on top of 20 ft & 40 ft shipping containers.
- In addition to be used as a stand alone anchor post, it can also be used to form a horizontal lifeline over the top of container depending upon the requirement of work to be done.
- Provides an elevated anchorage point, which reduces fall clearance.
- Comes with a Screw Handle & lock pad arrangement for secure installation by one person only.
- Can be removed without damaging the container.
- Has an anchorage Point on 4 directions allowing a 360° anchorage point, suitable for most of the connectors.

## Specifications

|                                 |                           |
|---------------------------------|---------------------------|
| <b>Height</b>                   | 610mm                     |
| <b>Weight</b>                   | 7.6 Kg                    |
| <b>Material Of Construction</b> | SS 316 / Powder Coated MS |
| <b>Compliance</b>               | EN 795:2012 Type B        |
| <b>Static Strength</b>          | 12 KN                     |
| <b>Min. Breaking Strength</b>   | 15 KN                     |
